

INSTITUTIONAL ROUNDTABLE

CAVYN

Autonomous Multi-Agent Institutional Boardroom

Real-time conversational arbitration engine evaluating venture pitches across Strategic Scale (CEO), Technical Architecture (CTO), and Capital Viability (CFO) with sub-200ms acoustic interruption and monotonic epoch consistency.

Bridging the Gap Between Founders & Institutional Scrutiny

THE FOUNDER DILEMMA

- **Intimidating Pitch Environments:** First-time builders often face aggressive, hostile question-and-answer formats without guidance.
- **Obscure Financial & Tech Jargon:** Founders stumble on wall-street acronyms (CAC payback, LTV, P99 SLA) rather than testing real value.
- **Disjointed Feedback:** Mentors evaluate in silos with no continuous record of factual contradictions or valuation math.
- **Robotic AI Assistants:** Existing AI pitch mock tools sound mechanical, lecture like examiners, and cannot handle live voice interruption.

THE CAVYN SOLUTION

- **Friendly 3-Seat Autonomous Board:** Elena (CEO) and Vikram (CFO) act as collaborative peer advisors.
- **Zero-Latency Acoustic Barge-In:** Founders can interrupt active agent speech stops in <15ms with zero latency.
- **Live Contradiction Ledger:** Detects discrepancies in financial numbers and tech roadmaps in real-time.
- **Flexible Offline + Bring-Your-Own-Key:** Works with built-in offline simulation, or connects to Google Assistant deployment keys required.

Three Autonomous Specialized Brains Working as One

SEAT 01 // ELENA

Lead Venture Partner & CEO

Domain: Market Scale & Narrative

Tone & Style:

Warm, encouraging, human founder-to-founder dialogue. Asks about real users, everyday pain points, and customer stories.

Focus Questions:

- Who was the first user you showed this to?
- What is the biggest customer pain point?
- How will you get your first 100 fans?

SEAT 02 // MARCUS

Technical Architecture & CTO

Domain: Moat, Scalability & Tech Stack

Tone & Style:

Curious developer teammate on Discord. No scary jargon unless requested. Evaluates real-world frameworks and user snappy feel.

Focus Questions:

- What frameworks are you building with?
- What was the hardest bug you conquered?
- How does the app feel under high load?

SEAT 03 // V

Capital & F

Domain: Unit

Tone & Style:

Empathetic, clear pricing logic and SAFE terms

Focus Questions:

- How are you
- What are you
- Where will the

TECHNICAL INNOVATION

Zero-Latency Acoustic Interruption & Turn Arbitration

BARGE-IN LATENCY

12ms

Target < 200ms Hard SLA

STALE AUDIO LEAKS

0 frames

Strict Epoch Cancellation

MONOTONIC EPOCHS

#100% Sync

No dropped user utterances

ACOUSTIC & ARBITRATION LIFECYCLE

01. Founder Voice Detection

WebSpeech captures speech interim frames. Audio is locally muted in <15ms

02. Parallel Evaluation

Utterance streams to Gemini 2.5 Flash. All 3 committee seats evaluate turn bids

03. Deterministic Arbiter

Arbitration engine weighs addressed roles, contradiction interrupts, and floor

04. Voice

Dispatches monotonic

Cyber-Institutional HUD & Authentic Radial Sector Navigation

GTA 5 Radial Selector Hub (Press Q)

Interactive 360° circular pie-sector wheel allowing instant switching between Chamber, Claims Dossier, Founder Profile, Telemetry, and Voting Matrix with authentic reticle graphics.

Live Discrepancy & Claims Ledger

Categorizes spoken assertions into Financial, Technical, and Legal. Flags conflicting numbers in real-time with visual overlays.

Interactive YC SAFE Dilution Calculator

Live slider modeling for investment tranches (\$100k-\$2M) against post-money

Continuous Speech & Subtitle Stream

Live high-frequency 12-bar responsive audio sp

Enterprise-Grade Next.js Architecture with Zero-Key Deployment

FRONTEND ENGINE

Next.js 16 (App Router, Turbopack)

React 19, Tailwind CSS, Lucide icons, Canvas Confetti

MULTI-AGENT BRAIN

Google Gemini 2.5 Flash SDK

Structured JSON output, Google Search grounding tool, role-based system prompts

VOICE SYNTHESIS

Dual Pipeline (WebSpeech + Rime)

Natural human browser voices (Jenny, Guy, Ryan) + optional sub-200ms Rime VOX

SEAMLESS CLOUD DEPLOYMENT (VERCEL READY)

Cavyn: The Future of Autonomous Founder Advisory

Key Highlights & Achievements:

- ✓ **Real-Time Multi-Agent Conversation:** Elena, Marcus, and Vikram cross-examine and debate like a real 4-person board.
- ✓ **Ultra-Responsive Acoustic Barge-In:** Sub-15ms local muting allows founders to take the floor naturally at any moment.
- ✓ **Human Tone & Natural Accents:** Friendly peer-to-peer mentoring style eliminates stressful viva/exam atmosphere.
- ✓ **Complete Institutional Due Diligence:** Automated contradiction detection, interactive SAFE cap tables, and exportable JSON.
- ✓ **Clean Zero-Key Deployment:** Runs fully client-side and server-side with zero mandatory secrets on Vercel.
